

# DESIGN STUDIES & INTEGRATION

Various integration projects

## Design studies & integration of deployable systems and measurement and test units

### Deployable Meteorological System

- ✓ DEMESYS (*Deployable Meteorological System*): A system for observation, forecasting and telecommunications in a military theatre of operations. (see photo opposite)

### Antennae

- ✓ Design and production of deployable systems (Antenna from 1m20 to 3m on the Ku and C band for satellite reception, and a Deployable Mast)

### Test units

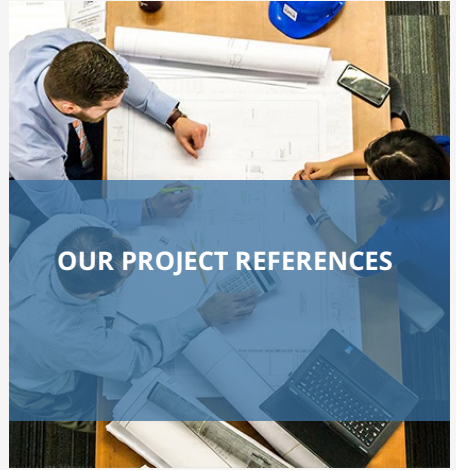

- ✓ Design and Integration of simulation and test

units (e.g.: the hybrid simulation unit for torpedoes)

- ✓ Development of the Qualification and Acceptance System for naval aviation buoys
