

WIND

DEOLIA396 Wind Sensor

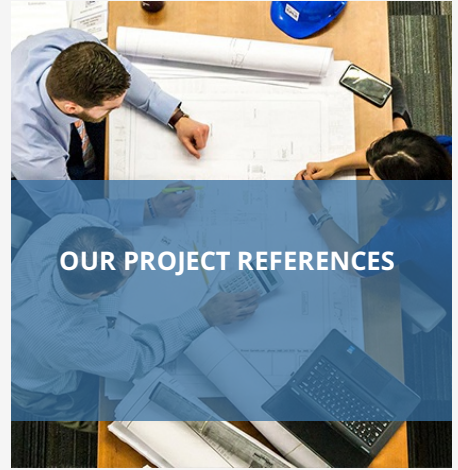

The DEOLIA396 wind sensor is a complete system that includes an anemometer, a wind vane and a universal wind transmitter that can be adapted to various configurations and complies with ICAO standards.

The PCL1300 Wind Profiler Radar

DEGREANE HORIZON is the only radar supplier who builds all of the major system hardware and software elements in-house. The result is unmatched performance, reliability and support. The PCL1300 Wind Profiler Radar system provides real-time vertical wind profiling at altitudes ranging from 75 to 5,000 meters, depending on output power and atmospheric conditions. It detects wind shear and measures turbulence.
